For a Healthy Sleep and Blissful Mornings  
**Your Mattress Should Be Bought From The Its Expert**

**jsbir** bedding

## ABOUT US

### We were born in the light shed by half a century of experience...

We believe that the mattresses we spend one-third of our lives on, are not just something we sleep on but a vital element that requires expertise and impacts our quality of life directly.

We have combined our experience from the past with the technology of the future. We have brought together all the emerging technologies in our beds so that you can experience a deep and uninterrupted sleep and wake up to happy days.

We combine the speed of machines with the value of labor. With the machines we have on our new production lines, we turn the mattresses we produce under the skillful hands of our masters and experts into unique comfort.

quality, we are also among the preferred brands at hotels that want to provide their guests with a privileged experience.

Our products are available to users in 26 countries especially European countries like Belgium, Germany, Holland, Austria, Hungary, Switzerland, England and Italy.

As a part of our “**Mattress Expert**” identity, we gather all the elements of a healthy sleep under one roof and personalize our products more each day to contribute to sleep culture.

A mattress is critical for mental, physical, and sleep health.  
This is why a mattress should be purchased from an expert.

## Each Of Its Brands Is A Part Of Its Expertise...

With a flexible and pressure reducing structure, the ViscoStar mattresses maintain the natural posture of the spine during the day, throughout the night and keep the blood circulation in the body flowing comfortably.

The viscoelastic material, which is the main ingredient of the ViscoStar mattresses, contain millions of microscopic cells. The mobility of the ViscoStar material molecules adapt ideally to the pressure points of the body.

This material, with pressure reducing properties, was first developed by NASA to help astronauts deal with the pressure they are exposed to in space travel. Transferring developing technologies in the world to the mattress sector and the sleep health field, İşbir Bedding uses the ViscoStar Comfort Layer that is its own registered brand, on the top surface of the mattresses it develops.

The ViscoStar material is activated by the user's body temperature and pressure. This activation continues until the mattress becomes ergonomic according to the body's own natural posture.

With comfort layers of different density, softness and a specially cut design, the Lateksit mattresses adapt to points like the shoulders, back and lower back, and support the spine.

By reducing the pressure in the body more compared to metal spring mattresses, it provides comfort and is silent due to the absence of springs.

These mattresses help users experience the comfort of a spring-free mattress without the feeling of being confined.

This technology is comprised of springs positioned in packages/bags, which move independently just like the keys of a piano.

The independent springs are placed in your mattress in a variety of combinations for different purposes. This enables the mattress to conform to your body's curves in the best possible way and to fill the lower back area.

In addition to normal models, there are models with 7 zones with increased ergonomics that adapt to the pressure points of the body like the head, shoulder, back, lower and hips. The micro pocket springs used in some of the models are highly alert to the most sensitive movements and weight.

Providing its users with a healthy sleep since the day it was established as a Mattress Expert, İşbir Bedding has been the licensed producer and distributor in Turkey, Hungary and Bulgaria for Spring Air, one of the biggest mattress brands in the world, since 2021.

Spring Air, available to sleep lovers in nearly 50 countries since 1924, appeals to users in Turkey with its select range of mattresses.

# COMFORT

## ViscoStar Memory Foam Mattress

**Designed for those who want to experience the ViscoStar comfort at the highest level.**

- Provides comfortable sleep with the increased thickness ViscoStar Comfort Layer on the top surface. This layer with increased thickness reduces pressure better and also makes blood circulation more efficient.
- It ensures that the spine's natural posture during the day continues throughout the night. The special structure of ViscoStar makes it impossible to feel movement at one point from another point.
- The support layer in it and the special cut adapt perfectly to the different pressure points like the head, shoulders, back, lower back and hips, and help your spine stay in the right position.
- The top cover, created by combining Quallofil Allerban Hygiene+ filling material and cotton weave fabric, is washable. It provides extra hygiene and moisture management.

# ERGOPLAS

## Polymer Spring ViscoStar Memory Foam Mattress

### Leave behind the magnetic field tiredness...

- Magnetic field syndrome is a combination of symptoms seen together, like insomnia, fatigue and chronic pain, when the natural magnetic field the body needs is deteriorated. Ergoplas helps to mitigate the negative effects of magnetic field syndrome caused by intense computer use or staying close to metals.
- The ViscoStar Comfort Layer on the top surface supports the spine and helps you to have a deep and uninterrupted sleep.
- The patented polymer springs have been placed individually in the specially designed support layer. The springs do not touch each other, enabling you to have an ultra-silent sleep experience. Springs with adjusted hardness to react differently to the various pressure points of the body have been used in this product.
- The top cover, created by combining Quallofil Allerban Hygiene+ filling material and cotton weave fabric, is washable. It provides extra hygiene and moisture control.

- |  |                              |

# NATURE

Soybean Fiber Fabric ViskoStar Memory Foam Mattress

**All of the curative effects of soy in your sleep....**

- The Soy Fiber Cotton Weave Fabric used on the top surface brings all the known benefits of soy to your bed. (Soy essence has a number of different benefits like reducing stress induced physical fatigue, preventing wrinkles, regular function of digestion, reducing indigestion and bloating).
- The density increased ViskoStar layer reduces pressure better and supports the body best with a wide weight range.
- The support layer in it and the special cut adapt perfectly to the different pressure points like the head, shoulders, back, lower back and hips, and help your spine stay in the right position.
- The top cover, created by combining Quallofil Allerban Hygiene+ filling material and soy fiber woven fabric, is washable. It provides extra hygiene and moisture control.

# BOSS

New Generation ViscoStar Memory Foam Mattress

**Ergonomic lower back support and a special design made for those who want a quality sleep experience.**

- |  |  |
|--|--|
| 1- ViscoStar Tencel Fabric                     | 6- ViscoStar 7 Zone Adaptive Support Layer |
| 2- Super Stretch Inner Cover                   | 7- 360° Easy Zipper                        |
| 3- Lateksit Super Soft Layer                   | 8- Antislip Fabric                         |
| 4- ViscoStar Aeromax Active Zone Comfort Layer |  |
| 5- Ergopedic Layer                             |  |

- İşbir's specially designed ErgoPedic layer distributes body weight evenly over the surface of the mattress. It supports the lower back by providing a softer feel in the shoulder and leg areas and a firmer feel in the hip and lower back areas.
- The Lateksit Super Soft Layer used on the top surface provides the user with a sleeping surface as soft as down. It enables blood to circulate comfortably. The new generation ViscoStar Aeromax Comfort Layer conforms excellently to the body's ergonomics, helping you to achieve a deep and uninterrupted sleep experience.
- The support layer in it and the special cut adapt perfectly to the different pressure points like the head, shoulders, back, lower back and hips, and help your spine stay in the right position.
- The Tencel thread in the fabric has a silky feel. It transfers moisture most efficiently to create an ideal sleeping climate.

# 100 PLUS

High Density ViscoStar Memory Foam Mattress

## Undeniable comfort at high weights...

- The ViscoStar Comfort Layer, the first in Turkey with over 100 density, on the top layer provides a deep and uninterrupted sleep. This high density appeals to the higher range of weight and supports the body at the maximum level even at very high weights.
- It maintains your spine's natural posture during the day, throughout the night. Reduces body pressure and makes blood circulation more efficient.
- The support layer in it and the special cut adapt perfectly to the different pressure points like the head, shoulders, back, lower back and hips, and help your spine stay in the right position.
- The special structure of ViscoStar makes it impossible to feel movement at one point from another point.
- The top cover, created by combining Quallofil Allerban Hygiene+ filling material and cotton weave fabric, is washable. It provides extra hygiene and moisture control.

UYKU  
PEDIA**THE MATTRESS EXPERT  
ANNOUNCES!**

Be careful what you eat a few hours before bedtime! Eating excessively fatty, spicy and sour foods a few hours before your bedtime can cause acid indigestion in your stomach and gas spasms, which will have a negative impact on the quality of your sleep. This is why you should be careful not to eat rich foods at least 2 hours before you go to sleep.

| 3- Super Strech Inner Cover |   |
| 4- Lateksit Dura Soft Layer |   |

- A 3-layered special design model has been applied from top to bottom in the design of Himera.
- The top layer that achieves its final form with a specialized cut, provides extra comfort with its point on pressure reduction feature.
- The 7-zone support layer in the middle section fully supports the spine while making the blood circulation efficient to provide natural climatization.
- The mono block layer on the bottom surface not only adds durability to the mattress but also provides comfort to users who want to sleep on a firmer surface.
- The cover made from a combination of Hygiene+ filling material and viscose woven fabric, is washable. This provides extra hygiene, practicality and moisture control. A unique touch experience.

## Horsehair Lateksit Mattress

### An ancient mattress tradition carried from history to the present...

- Horse hair, which is one of the natural materials with the highest breathability, has maintained its importance from ancient history to the present as an indispensable element of sleep since ancient history.
- The special linen fabric on the top surface, the natural silk padding and real horsehair layer form efficient air circulation. These layers help to prevent moisture build-up and create an ideal sleeping climate.
- These natural materials also add extra air circulation and hygiene to the mattress.
- The comfort and support layers produced from the Lateksit material maintain your spine's natural posture during the day, throughout the night.
- The 7-zone support layer in the mattress conforms fully to the different weight points like the head, shoulders, back, lower back and hips thanks to the special cut, and helps keep your spine in the correct position.

# COCO DREAM

Natural Ingredient Mattress With Coconut Fiber

**Prepare yourself for an exotic sleep experience covered with naturalness.**

- Coco Dream invites you to discover the mysterious spirit of the coconut shell for an exotic sleep experience you have never had before.
- The natural coconut shell fibers keep you cool in the summer and warm in the winter with the air channels inside them and a supportive firm structure.
- At the same time, these natural materials add extra air circulation and hygiene to the mattress.
- The fabric is organic cotton obtained completely from natural fibers.

Sleep Freely...

UYKU  
PEDIA**THE MATTRESS EXPERT  
ANNOUNCES!**

Relaxing routines make your sleep even more peaceful. Taking a warm shower before going to sleep, meditating, listening to soothing music in dim light makes it easier to fall asleep and provides a more peaceful sleep environment.

POCKET SPRING

# ALISSA

Ergonomic Pocket Spring Mattress

## The choice of those who praise ergonomics...

- Distinctive with its durability and comfortable structure, Alissa provides amazing ergonomics to sleep lovers with the 3 different comfort layers on its top surface.
- The layers lined up from soft to firm keep blood circulation efficient throughout the night and prevent involuntary turning.
- According to the height-weight index this product is ideal for users with medium weight.
- Attractive with its stylish quilting on both sides, the pocket spring system inside provides the user with comfort.
- The pocket springs, which are designed to support the body in the best possible form, are independent of each other, silent and prevent movement at one point being felt at another point.

- |                               |                                |

# ELITE POCKET

## Ergonomic Pocket Spring Mattress

### Elegant lines, unique slumber...

- The weight distribution and medium firm layers used on the support layer, support the spine and distribute the weight evenly on the surface. The springs inside the independent pockets are silent.
- The layers above these, which are lined up from soft to firm, make blood circulation efficient throughout the night. The space behind the lower back is filled.
- With hygiene+ filling materials and a four channeled structure, this mattress is highly breathable. It creates an ideal sleeping climate for the user.
- The fabric, which is produced from beech trees, provides comfort and elegance together with its brilliance and softness.

# FREZYA

Ergonomic Pocket Spring Mattress

**The ViscoStar comfort for everyone...**

- The upper surface is enhanced with a ViscoStar comfort layer to offer more ergonomics.
- The 3D cut layer reduces the pressure applied on the body and ensures efficient air circulation during sleep.
- While the ViscoStar material creates a soft touch, the pocket springs provide support to the body. Springs inside independent packages are silent and do not become deformed over time.
- The viscose woven fabric has been produced with natural threads and the washable cover is hygienic and practical.

- |                                    |                              |

## Super Ergonomic Pocket Spring Mattress

### Excellent ergonomics with comfort layers...

- Designed to provide excellent support with various concentrations and thicknesses of comfort layers in the top surface. The special comfort layers, lined up from soft to firm not only soothe the body's muscle tissues but also support the spine.
- In addition to a layer that distributes body weight over the mattress, the 7-zone pocket spring system conforms uniquely to all the pressure points of the body. These springs are silent and will not get deformed over time.
- The enhanced comfort layer inside provides effective comfort for sleeping on your side.
- Provides outstanding comfort for medium weight users according to the height-weight index.
- The mattress carries a feeling of freshness and spaciousness for a long time with Hygiene+ technologies in its natural content, knitted fabric and quilting.

# GENNA

Ultra Ergonomic Pocket Spring Mattress

An ergonomic sleeping surface enhanced with pad comfort...

- |                                      |   |
|--------------------------------------|---|
| 1- Knitted Fabric                    | 9- HD Edge Supporter                    |
| 2- Hygiene Plus Fiber                | 10- V2 Active Zone Pocket Spring System |
| 3- Hyper Soft Continent Layer        | 11- Counterweight White Felt            |
| 4- Super Flex Continent Layer        | 12- Durasupport Layer                   |
| 5- Lateksit Super Soft Comfort Layer | 13- Knitted Fabric                      |
| 6- Hyper Soft Continent Layer        |   |
| 7- Durasupport Layer                 |   |
| 8- Counterweight White Felt          |   |

- Genna has been designed for those who want pad comfort. The fluffy mattress pad, created with the down foam layer on its upper surface, fully adapts to the spine with its ergonomic structure, fills the lower back gap and provides comfortable sleep.
- The 7-zone pocket spring system that responds differently to the various points of body weight, conforms uniquely to all the body's pressure points. These springs are silent and do not become deformed over time.
- The layer that distributes body weight evenly over the mattress surface also adds durability.
- The mattress's breathability has been increased with the 3D Spacer fabric on the sides.
- Tested with a 30 thousand sitting simulation in line with TSE standards, the success of its high endurance has been documented.

# LAVENDER GARDEN

## Lavender Fragrance Pocket Spring Mattress

### Nature features in your sleep with one of the loveliest scents...

- Lavender Garden gets its name from the millions of lavender scented capsules placed in them, inside nano-capsules. The cooling, soothing and stress reducing effect of lavender will enable you to fall asleep quickly. Studies show that the scent of lavender increases the period of deep sleep.
- The comfort layers in the design of the mattress are lined up from "soft to firm" starting at the top surface towards the bottom layers. This helps you experience efficient blood circulation and a comfortable sleep.
- The 7 zone pocket spring system responds to the different points of weight on the body and protects the natural posture of the spine. The ViscoStar layer on the top surface fills the lower back gap and provides comfort.
- The natural content woven fabric is skin friendly.

- |                                     |  |
|-------------------------------------|--|

| 6- Counterweight White Felt           |  |

## The cooling and refreshing effect of seaweed in your mattress...

- Fabrics with seaweed essence add softness and freshness to the skin during sleep and bring the benefits of ancient Chinese medicine into your sleep.
- The 7-zone pocket spring system responds to the different points of weight on the body and protects the natural posture of the spine.
- The ViscoStar layer on the top surface maintains proper blood circulation throughout the night and prevents involuntary turning.
- Carbon threads that conduct electricity help remove the electricity that accumulates in the body throughout the day and causes stress, while you are sleeping.
- The spring technology and ViscoStar layer make sure movement on one part of the mattress cannot be felt in another part.

# ENERGY CELLIENT

Hybird Mattress For The Athletic Life

**Designed for people who like an active lifestyle...**

- The Energy Celliant mattress, which is suitable for almost any type of body, has been designed to suit athletes in particular.
- With the point on pressure applied by the special cut comfort layer accelerates the dispersing of lactic acid that can accumulate in muscles due to athletic activities to help relieve muscle aches.
- The ViscoStar Aeromax used on the top surface conforms exactly to the spine and enhances the feel of the specially cut layer.
- The carbon thread Anti-Cortisol Technology in the fabric helps to capture the negative electrons that accumulate in the body and release them into the air. The uniquely designed black-orange cover with Hygiene+ technology is washable.
- In addition to the layer that distributes weight evenly over the mattress surface, the 7-zone pocket spring system conforms uniquely to all the pressure points of the body. These springs are silent and do not get deformed over time.

# ELLA PILLOW TOP

Spring Air Padded Ergonomic Pocket Spring Mattress

## The comfort of padding meets ergonomics and spaciousness ...

- Ella Pillow Top combines ergonomics with high comfort with the mattress pad it has. The special pad, which uses a combination of **ViscoStar Aeromax** and **HR Layers** with increased height, provides extra comfort by releasing the trapped heat and pressure.
- **Dura Support Lateksit** layer, which allows you to have a calm sleep experience by balancing the movements inside the bed is used. This layer helps to distribute the weight in a balanced way. The arrangement in the comfort and support layers makes blood circulation active during the sleep process.
- In addition to the layer that distributes body weight on the mattress surface, the **Back Supporter 7-Zone Pocket Spring System** adapts to all pressure points of the body. These springs do not make sounds, do not deform over time.
- Thanks to **Cool & Dry Technology**, it breathes and cools the user more, regulates the sleep atmosphere. It does not contain static current with its anti-static property.
- The mattress fabric produced with **Feran Ice Technology** offers an ideal sleeping climate during the night with its thermo regular feature. It provides a fresh sleep experience by minimizing sweating with effective moisture management.

- |  |                                 |
|--|---------------------------------|

# GLORIA FIRM

Spring Air Pocket Spring Mattress

## Open your eyes to naturalness ...

- The quilting is enriched with cotton wadding, which is one of the most breathable natural materials. This layer removes moisture from the body to regulate the microclimate during the night. It sets the ideal sleep temperature.
- **ViscoStar Aeromax** and **HR** comfort layers on the upper surface make blood circulation active throughout the night and prevent involuntary turns.
- **Dura Support Lateksit** layer is used, which allows you to have a calm sleep experience by balancing the movements inside the bed. This layer helps to distribute the weight in a balanced way.
- The weight distribution layer is placed on the spring system, so the ideal degree of hardness is adjusted.
- In addition to the layer that distributes body weight on the mattress surface, the **Back Supporter 7-Zone Pocket Spring** System adapts to all pressure points of the body. These springs do not make sounds, do not deform over time.
- **Tencel** fabric with superior moisture management and touch has been preferred. In this way, it helps to keep the temperature at the ideal level by relaxing the body temperature with effective evaporation.

- |  |                                 |
|--|---------------------------------|
| 1- Tencel Fabric                                 | 9- HR-TECH SOFT Comfort Layer   |

Spring Air Ergonomic Pocket Spring Mattress

## Sleep naturally and comfortably ...

- Quilting enriched with **natural cotton wadding** breathes, thus helping to regulate the ideal sleep atmosphere by ensuring the moisture balance in the body throughout the night.
- **Viscostar Aeromax** and **HR** comfort layers developed with superior sleep technologies ensure healthy blood circulation throughout sleep and allow you to have a restful sleep.
- **Soft Dura Support Lateksit** support layer is used, which increases the ergonomics and softness of the bed.
- **The Back Supporter 7-Zone Pocket Spring System** developed with special technologies fully adapts to all pressure points of the body.
- The weight distribution layer on the spring system has been removed and the softness ratio has been adjusted.
- **Tencel** fabric with superior moisture management and touch has been preferred. In this way, it helps to keep the temperature at the ideal level by relaxing the body temperature with effective evaporation.

# JUBILEE

## Spring Air Padded Ergonomic Pocket Spring Mattress

### For those seeking ergonomics and the comfort of padding ...

- Wool, which is one of the natural materials that can hold heat best with its curly and thin-long fibers, also has the ability to absorb high humidity and evaporate due to its structure. Enriched with natural **wool wadding**, which is renewable, environmentally friendly and effective in climate management, Jubilee offers its user a natural sleeping platform.
- A superior comfort has been gained with the original pad design. The **ViscoStar Aeromax** comfort layer, designed to adapt to the ergonomics of the body, is accompanied by the specially designed **ErgoPedic** layer of İsbir.
- With the comfort of **ViscoStar**, the continuation of blood flow is ensured smoothly, involuntary turns are reduced. With the **ErgoPedic** layer, the body weight is distributed evenly on the mattress surface. This layer is soft to the shoulder and leg area and supports the waist by providing a firmer feeling to the hip and waist areas. It offers a deep and uninterrupted sleep.
- Dura Support Lateksit** layer is used, which allows you to have a calm sleep experience by balancing the movements inside the bed. This layer helps to distribute the weight in a balanced way.
- In addition to the layer that distributes body weight on the mattress surface, the Back Supporter **7-Zone Pocket Spring System** adapts to all pressure points of the body. These springs do not make sounds, do not deform over time.
- Tencel fabric with superior moisture management and touch has been preferred. In this way, it helps to keep the temperature at the ideal level by relaxing the body temperature with effective evaporation.

### THE MATTRESS EXPERT ANNOUNCES!

Choosing the right pillow for you will affect the pressure your body applies to the pillow and your mattress, the condition of your veins and nerves and how the heart functions to help you drift into a healthy sleep.

**VISCOMED®**  
**MEDICAL SUPPORT  
SYSTEMS**

# TRAVEL PILLOW - SLEEP

Neck Support Pillow For Travel

**The pleasure of sleep while you travel...**

This pillow is designed to fill the space behind your neck by conforming fully to your head and neck. Convenient to carry, you can bring good quality sleep with you wherever you go.

**W: 30 cm L: 25 cm H: 10 cm**

# TRAVEL PILLOW - NECK PRO

Travel Neck Pillow

**Uninterrupted comfort during travel...**

A practical solution for those of you who have trouble sleeping in the vehicle during travel. This pillow relieves neck and shoulder muscles as a whole. The special design conforms fully to the neck and jaw area. High air permeability.

**W: 28,5 cm L: 27,5 cm H: 10,5 cm**

# VISCOSNORE

Anti-Snoring Pillow

**Interrupted breathing and snoring become a thing of the past ...**

The goal is to reduce snoring by gently stretching the loosened soft tissues that cause snoring in the air passageway during sleep. By making breathing easier, excessive perspiration and restless sleep is prevented.

**W: 20 cm L: 30 cm H: 10 cm**

# VISCOFIL

Body Support Pillow

**Keep in shape...**

While keeping the neck, back and legs in the proper position and form, this pillow also provides comfort to the neck, lower back and legs while resting or sleeping. It can be used in your car for arm/elbow support.

**W: 20 cm L: 20 cm H: 50 cm**

# VISCOMOON

Neck Support Pillow

**Uninterrupted comfort during travel...**

A practical solution for those of you who have trouble sleeping in the vehicle during travel. This pillow relieves neck and shoulder muscles as a whole. With a design that fits the neck perfectly, this pillow helps relieve the neck area. High air permeability.

**W: 35 cm L: 35 cm H: 10 cm**

# VISCOKNEE

Body Support Pillow

**The secret to restful sleep during pregnancy...**

Ensures proper posture by supporting the lower body. Placement under the abdomen when sleeping on the side during pregnancy ensures an ideal sleeping position. It provides comfort and prevents numbness.

**W: 40 cm L: 70 cm H: 8 cm**

## VISCOREST

Back Support Pillow  
Healthy support for your spine...

Supports the bottom, side and back areas of the body and ensures proper posture. Protects the "S" curve of the spine. The orthopedic design reduces back fatigue while sitting and driving. It will make you feel better by reducing the tension on your nerves and muscles.

**W: 30 cm L: 35 cm H: 15 cm**

## VISCOFORT

A Sitting Cushion With a Back Pillow

**At home, in the office and in the car, comfort is everywhere...**

Relieves the back and lower back area by protecting the natural curve of the spine. Provides a comfortable surface with the attached bottom cushion

**Cushion - W: 40 cm L: 40 cm H: 7 cm / Pillow - W: 35 cm L: 35 cm H: 10 cm**

## VISCOFIX

Sitting Cushion

**No more back discomfort for drivers and office workers...**

Reduces back fatigue while sitting and driving with its orthopedic design and supports the spine.

**W: 35 cm L: 35 cm H: 10 cm**

## VISCOSIT

Sitting Cushion

**Office workers are doing well...**

The orthopedic design reduces fatigue in the lower body while sitting and driving. Reduces tension on the nerves and muscles.

**W: 40 cm L: 40 cm H: 7 cm / Opencell Visco Technology**

## VISCORING

Hemorrhoid Pillow

**A solution for sitting problems...**

Designed for sitting sickness caused by conditions like Hemorrhoids and coccyx extension. The ViscoStar material in the top part of the cushion provides comfort and prevents numbness.

**W: 40 cm L: 40 cm H: 10 cm**

## REFLUMED

Viscoelastic Reflux Pillow

**A solution recommended for reflux, the disease of the modern era...**

Prevents the contact of stomach acid with the esophagus with the positional advantage it provides. Since the surface of pillow you lay on is made of ViscoStar material it provides excellent air flow.

**W: 60 cm L: 65 cm H: 25 cm**

## NECK SUPPORT PILLOWS

### POLIREST

Homogenous Support Pillow

**A comfortable and enjoyable pillow ...**

Very comfortable with a ViscoStar layer on the top surface. Useful in different areas of the body (head, neck, lower back, legs and under the knees and ankles).

Provides support for pregnant laying on their side. A comfort pillow produced for people with aching sensitive areas and pressure discomfort.

**Small - W: 45 cm L: 65 cm H: 7 cm / Standart - W: 40 cm L: 70 cm H: 8 cm**

### VISCOGOLD

Neck Support Pillow

**Comfort that fits the neck perfectly ...**

Made to suit the anatomical structure of the neck, this pillow supports the neck and shoulder muscles and helps tissues relax. Ideal for people with neck issues and for laying on the back and side.

**Small - W: 60 cm L: 30 cm H: 9 cm / 60 - W: 60 cm L: 30 cm H: 2 cm**

**70 - W: 70 cm L: 30 cm H: 12 cm / XL - W: 60 cm L: 40 cm H: 15 cm**

### VISCOLIFE

Neck Support Pillow

**For those who like high pillows...**

Designed for people who prefer high and firm pillows. The best neck and shoulder support. High air permeability. Helps neck and shoulder muscles relax.

**W: 35 cm L: 63 cm H: 12 cm**

### VISCOAIR

Neck Support Pillow with Granule Gel

**Designed for refreshing uninterrupted sleep ...**

The granular gels in its formula, create a feeling of cooling in the neck and shoulder area, even in hot weather, and increase your sleep comfort.

Supports the neck and shoulder muscles according to the anatomic structure of the neck vertebrae and helps tissues relax. The life model is ideal for people you like thick pillows.

**60 - W: 60 cm L: 30 cm H: 12 cm-9 cm / 70 - W: 70 cm L: 30 cm H: 12 cm-9 cm**

**Life - W: 60 cm L: 40 cm H: 15 cm-12 cm**

## THE MATTRESS EXPERT ANNOUNCES!

According to studies, some activities done before sleep slow down the movements and bring sleep.

## FUNCTIONAL PRODUCTS

# ENGINE POWERED LATH SYSTEM

**Designed for people who enjoy their time in bed... Read more, rest and have a pleasant time.**

- Slatted systems that form the infrastructure of a good bed increase the elasticity and ergonomics of the sleeping base.
- By providing a balanced distribution of body weight it helps prevent back, lower back and muscle pain.
- The silent motor and remote command system give you the high-quality living standard and comfort you seek.
- With the independent movement of the head and foot sections, your bed can be adjusted at the desired height.
- With the adjustment mechanism on the slats, the degree of hardness can be adjusted according to weight. This provides comfort and superior ergonomics special to the person and weight.
- It provides an effective mechanical solution to reflux discomfort as its height can be adjusted easily and at the desired level from the waist.

## FIXED LATH

## GOOSE FEATHER PILLOWS & QUILTS

Feathers obtained from geese with genetically high resistance to cold, bring high thermo strength and softness together. With its natural structure, goose down protects the body from temperature changes, regulates moisture and creates the most suitable atmosphere for sleep.

Goose feather allows the body to breathe thanks to its "Hygroscopic" feature. It can be easily fluffed and regains its former fullness. The cotton fabric of goose down products provides a unique coating experience with climate regulation.

## MATTRESS AND PILLOW MATTRESS PROTECTORS

## WATERPROOF MATTRESS PROTECTOR

The waterproof under sheet, which protects your mattress from adverse situations, offers healthy and ergonomic use.

## FITTED WATERPROOF MATTRESS PROTECTOR

Produced especially for the needs of babies, children and patients. The special cut, completely wraps the mattress and does not slip.

## MATTRESS PROTECTOR

The undersheet, produced with the expertise of İşbir Bedding, prevents your mattress from getting dirty and stained, and extends its life. Easily spread over the mattress with elastic on all sides.

## QUALLOFIL® ALLERBAN® MATTRESS PROTECTOR

The undersheet, produced with the expertise of İşbir Bedding, prevents your mattress from getting dirty and stained, and extends its life. Easily spread over the mattress with elastic on all sides.

## FITTED CLIMARELLE® MATTRESS PROTECTOR

"Climarelle®", a smart sleep technology, actively adapts to your body temperature, creating superior sleep comfort. When the temperature is higher than ideal, the Phase Change Material (PCM) microcapsules integrated into the Climarelle® soft stretch lining turn into liquid form and bring the temperature back to the optimum level, providing a cooling effect to promote healthy and deep sleep.

## SILICONE PILLOW PROTECTOR

Silicone pillowcases produced with İşbir Bedding quality protect your pillow and keep it clean and new for years.

## THERMOLITE 95°C PILLOW PROTECTOR

Thermolite 95°C pillow covers protect your pillow and keep it clean and new for years. The special structure helps to maintain its soft form even when washed at high temperatures. Always stays hygienic.

## QUALLOFIL® ALLERBAN® PILLOW PROTECTOR

The licensed fiber filling has air permeable technology. It will protect your pillow for many years and regulate the temperature. You can find the compatibility of the base headboards in our product collection from this table.

## UYKU PEDIA

### THE MATTRESS EXPERT ANNOUNCES!

According to research, we need 3 different sleep phases lasting between 60 and 100 minutes for our body to renew itself.

The first stage is the drowsiness stage between sleep and wakefulness.

Deep sleep phase in the second house.

The third stage is known as slow wave sleep.
